

ISACA Warsaw Chapter is
organizing

CISA exam preparation course

Warsaw Chapter

Entire training will be held in English and will be facilitated by experienced trainers from Malta. The quality of the training was confirmed by extraordinary achievement of a participant of the course who got the highest CISA result in the world in June 2007 CISA exam.

The training should be treated as an aid in the process of preparation to CISA exam. Thus aim of the training is not to discuss every subject in details. During 4 days long training participants will have opportunity to compare own knowledge to requirements of the exam. The training would be a great opportunity for knowledge sharing among participants and finding answers for ferment questions. The training will include: theory sections, practical discussion as well as discussion on exam passing techniques. During the training you will be resolving exam related questions and by the end of the training you will have to complete **moc exam** to verify your knowledge and identify areas for further improvement.
